

Select Grade® Integral Color

Coloring System Guide

Many things can affect the appearance of color. For best color matching results, a representative job site sample should be cast using materials and finishing techniques that will be used on the project.

Colors shown on this chart represent formulations using medium gray cement and sealed with solvent based Clear Guard® Cure and Seal. Variations can be expected due to differences in cement, aggregates and method of application. **NOTE:** When using lower color loadings, such as one bag per two yards, the color of the cement and sand have a more pronounced influence on the final color resulting in a greater chance of color variation.
